Batteries

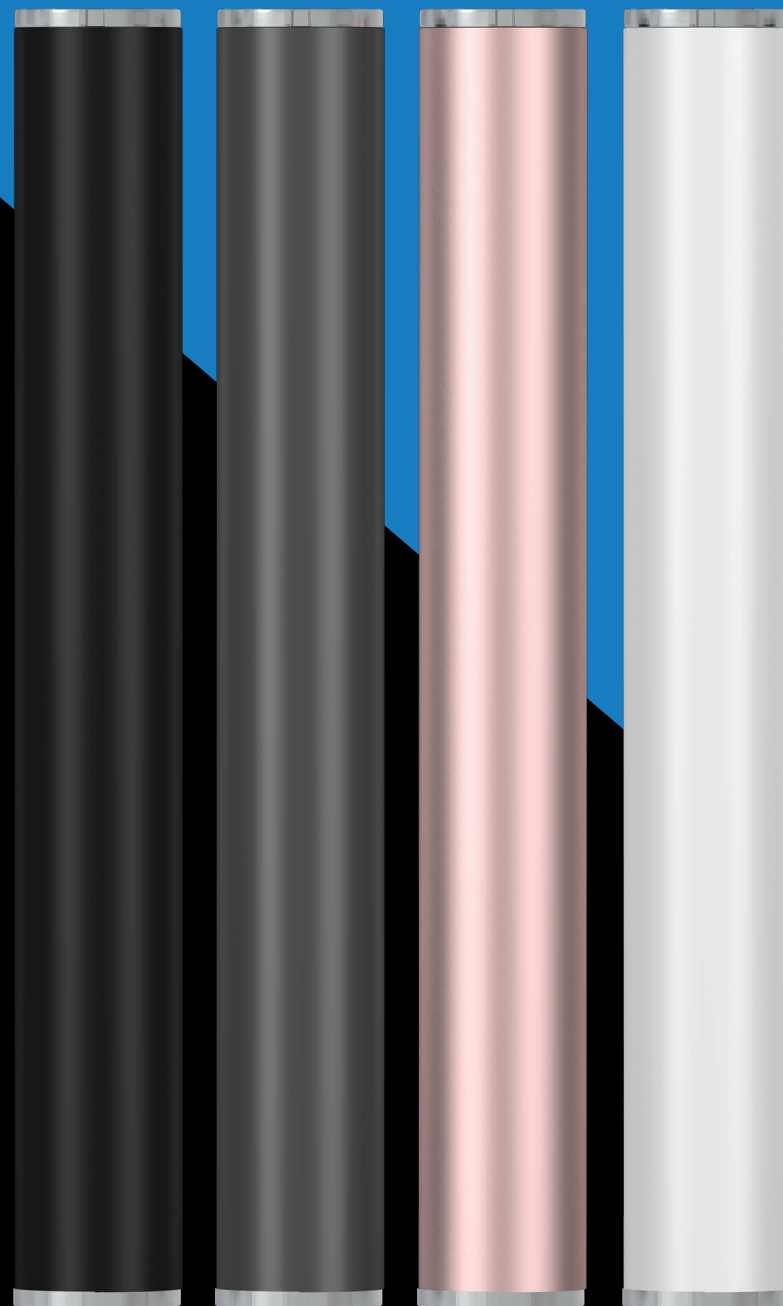

Breeze Buttonless Battery

The **Verified®** Breeze Buttonless Battery offers the perfect balance of high performance and compact design. With an easy-to-use button free activation, the **Verified®** Breeze Battery is inhale activated with a self-adapted optimum temperature setting. The **Verified®** Breeze Battery is compatible with all Universal 510-thread cartridges and comes complete with a micro-USB charger; making it ideal and convenient for personal use.

TECH SPECS

- Draw activated
- Battery: 350mAh
- Dimensions: 10mm / 76mm
- Rechargeable li-ion battery
- Universal 510-thread
- Available in black, graphite, rose gold and white

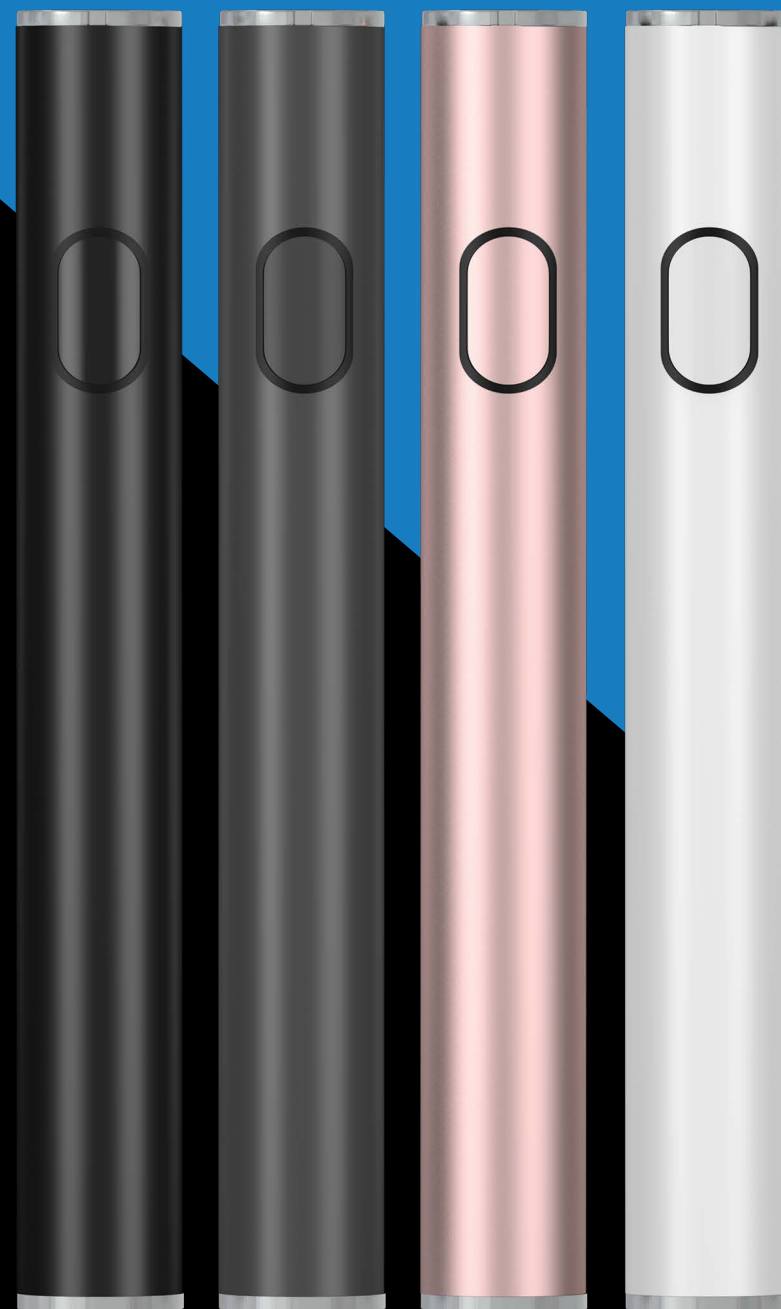

Nova Variable Voltage Battery

The **Verified®** Nova Battery offers an ideal balance between safety and high performance with a compact and discrete design. With the inclusion of a 350mAh button-activated battery, the **Verified®** Nova Battery allows for three separate heat settings. Consumers can choose their perfect heat setting by clicking through three voltage options. This innovative flexibility offers the freedom to customize how oils of different viscosities are enjoyed. While offering a preheating function that warms thicker oils for maximum vaporization, the **Verified®** Nova Battery is ideal for either thick or thin oils.

TECH SPECS

- Button activated
- Battery: 350mAh
- Dimensions: 10mm / 93mm
- Rechargeable li-ion battery
- Universal 510-thread
- Available in black, graphite, rose gold and white

Disposables

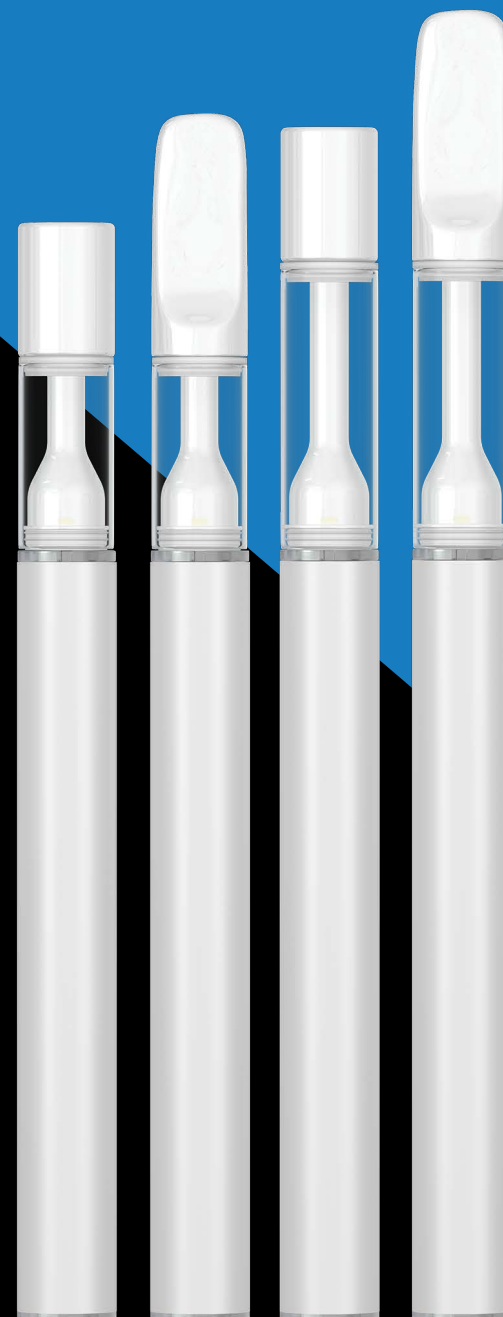

Ghost Series Ceramic Disposables

Verified® All-In-One "Ghost Series" offers the impressive and revolutionary technology of ceramic based disposables. By eliminating the possibility of exposure to harmful metals, Verified® Ceramic Disposables are composed of fully ceramic materials. The "Ghost Series" Full Ceramic Cartridge makes use of an impressive built-in carburetor design that provides consistent airflow control. By utilizing premium materials, Verified® "Ghost Series" provides optimal heat conduction and the best-in-class performance offering our consumers to indulge in pure flavor and powerful potency.

TECH SPECS

- All-In-One Sleek Design

Processing

Precise Cartridge Filler

The Verified® Precise Cartridge Filling Machine utilizes an "state of the art" internal heating system, providing an easy-to-use filling experience without the need for a bulky heating jacket. The 360° transparent tube offers you the ability to see the amount of oil left at all times. The Verified® Precise Cartridge Filling Machine comes with everything you need to get started on filling your cartridges right away!

TECH SPECS

- Capacity: 25ml
- Voltage: AC 100–240V
- Temperature Range: 0–100° C
- One Year Warranty Included
- Input Power: 40W
- Adjustments: 0.5ml / 1.0ml / 1.5ml / 2.0ml / 2.5ml

Arbor Press

The **Verified®** Arbor Press is an impressive and effective option to press and seal pressurized resin cartridges. With an easy-to-use system and compact design, the **Verified®** Arbor Press is an ideal choice for those looking to save time and utilize an efficient pressing and sealing experience. The **Verified®** Arbor Press is unlike any other on the market. From start to finish, the **Verified®** Arbor Press is efficient, convenient and guaranteed to make the pressing and sealing experience an enjoyable one.

USAGE INSTRUCTIONS

Start by placing the cart in the proper fitting base (0.5ml or 1.0ml.) Then place the resin tip on the top of the chamber. Press the handle down until you hear an audible click. And just like that, you are left with an impressively sealed cartridge that is ready for use or distribution.
